

Company information

VR Medical builds ecosystem in VR for rehabilitation (we can say exercise) that is focused on:

- physio rehab • neurological patients • pain management

With an increasing disproportion of demand and supply in rehabilitation and negative financial and health repercussion related to insufficient rehabilitation in hospitals, clinics and workspaces, we have decided to devote ourselves to this problem.

That's where VR Medical was born. VR Medical is a start-up with long-term technological and strong financial backgrounds.

We have global ambitions to become the leading player in the area of rehabilitation utilizing VR and other technologies.

Our partnership network:

- CIE Group is a company with long-term expertise in ergonomics and VR technologies.
- JUFA Investment Group is a Czech investment company, and is one of the fastest growing owners of photovoltaic power plants in the Czech Republic.
- West Bohemia University – Official partner. Collaboration on development and research across different disciplines.
- Experts in physiotherapy, orthopedics, traumatology, neurology, psychiatry, psychology and mental coaching.

Our customers/partners include University Hospital of Pilsen, University Hospital of Olomouc, Rehabilitation Hospital Beroun, Safran, Leki, Valeo, IAC etc.

Expectations

We are offering to become a part of the rehabilitation re/evolution in various ways:

- Customers – In the Manufacturing sector that want to improve physical health of employees/workers, decrease the rate injuries and health disabilities and increase Employees Satisfaction.
- Customers – In the Medical sector that want to speed up physical and mental recovery of the patients, free up capacities and reduce burden of health workers, increase the volume of rehabilitation capacities.
- Partners that want to participate on development of product and business.

Presentation topic(s)

- Virtual reality as an effective tool for employee care
